windows

Windows are an essential part of any building. We continually look through them - at the landscape, the street, the weather - but how often do we look at the window itself?

Windows can instantly reflect the style and character of your property. 'Kerb appeal' is a term often used by estate agents as an important selling tool and it's used for very good reasons. But, when choosing your new windows it's not just visual elements that need to be considered. Whilst the importance of style and character should not be underestimated, energy efficiency and security should equally not be overlooked and can have a huge impact on both lifestyle and returns on investment.

Manufactured entirely in the UK and to the very highest standards, PlatinumNRG is one of the best performing window products available on the market today. Our PVCu windows are slender and stylish and are available in 28mm double-glazed or 36mm triple-glazed sealed units, offering the ultimate in sound protection and heat retention.

Our PVCu windows are recyclable and 100% lead free. Our state of the art intelligent design allows us to use 50% less steel, and recycling is done entirely in the UK reducing our carbon footprint still further. Available in a range of fully customisable styles and colours, our innovative profile and hardware designs provide increased security,with selected products able to be certified as 'Secured by Design' an accolade run by the Association of Chief Police Officers.

As well as high performing PVCu, a selection of our windows are also available in aluminium. With their low thermal expansion and inherent strength, our precision engineered aluminium products offer an excellent alternative for use in both contemporary and traditional settings,being available in both white as well as a complete range of RAL colours to your own personal taste.

Platinum NRG

casement

Our standard 70mm deep casement windows are double-glazed and sealed to keep homes warm, dry and draught-free.

The superior energy efficient glass and frames are standard features helping homes to stay quieter and more secure, coupled with internally beaded glazing features that make it impossible for intruders to remove the glass from the outside of your home.

The 28mm double-glazed sealed units offer maximum sound and heat retention and can be specified at various levels up to the very highest A+ rating levels - the most energy efficient currently available.

Manufactured from wipe-clean PVCu or aluminium, our casement windows are attractive, low-maintenance and all carry a 10-year guarantee for your complete peace-of-mind.

Available in both chamfered or sculptured finishes, black low-line gaskets that help increase the window area and a choice of handle types, finishes and colours, our casement windows are an excellent choice for any home of any era.

NRG Triple Glazing

PlatinumNRG Triple Glazing uses three panes of glass which form two insulating layers that provide the ultimate thermal and acoustic insulation.

Almost indistinguishable from their double glazed counterparts, but superior in terms of performance by using two panes of Low E glass (the internal and middle panes), two warm edge spacer bars and two argon-filled cavities. Add to this the external pane of glass - which lets in more of the sun's warmth – and the PVCu window frame, and you have a window that will make your home a warmer, quieter, cheaper and more environmentally friendly place to live.

The industry-leading 6-chamber PVCu frame eliminates the need for thermal inserts and uses structural PVCu for rigidity rather than heat-conducting steel.

Triple glazing will plug the deficit as it can retain heat unlike any other window type. It can also reflect heat into the home due to the internal pane of soft coat glass inserted into the PVCu frame.

PlatinumNRG Triple Glazing exceeds the thermal efficiency of even an A-Rated window by over 35%.

The additional cavity created by having 3 panes of glass increases sound insulation by over 20% - ideal for installations close to main roads, railway lines, airports or in busy urban environments.

By adding a third pane of glass to your windows you will be enhancing security in your home as not only are they internally glazed but they also use toughened glass for the inner pane.

slimSASH

The opening vents of these 70mm slim PVCu windows use a special SlimSASH profile exclusive to PlatinumNRG products.

SlimSASH has a larger glass area, allowing more daylight into your home whilst still achieving outstanding energy efficiencies, due to its 6 chambered construction detailing.

These slim profile PVCu windows have a chamfered 'putty-line' external profile, with a choice of matching chamfered or alternative sculptured internal glazing beads if required. Manufactured from high-impact modified PVCu to prevent warping or cracking and with fully welded frames, SlimSASH windows are the very ultimate enhancement to any home.

SlimSASH is available in an extensive range of colour finishes with push button, key-lockable handles also in a choice of colours, so you can easily create the perfect look and style to suit your home. Optional shoot-bolt locking systems and anti-intrusion hinge bolts can also be specified to further aid your security levels, ensuring both sides of your new windows are equally protected from potential forced attack.

tilt & turn

Offering easy ventilation and cleaning, our dual functioning tilt and turn window is a great addition to any home.

Open it like a door (inwards) or tilt the top of the sash into your room to provide secure ventilation without allowing access into the home, it offers an excellent solution especially if you have young children. They are versatile, secure and easy to operate. With a simple twist of the handle, the window can be tilted inwards from the top for ventilation. Re-closing the vent and then doing another half turn of the handle allows you to open the window the whole way from the side to let the outside in.

The design provides you with a slim, low maintenance, practical window which combines modern styling with easy operation and is perfect for larger window installations or modern extensions.

All our Tilt & Turn windows have the glass fitted from the inside for added security meaning intruders cannot remove it from the outside. Low level black cushioning gaskets increase the visible sight-lines of the product and with an array of glass, colours and furniture options, this product is about as versatile as it gets.

TILT & TURN HANDLES

The Tilt and Turn handles control whether the sash tilts or turns. The handle turned at 90^{O} will allow the sash to tilt. Turning the handle 180^{O} prevents the tilting movement but releases the lower hinge to allow the whole sash to open as a conventional side-hung window, although the sash will swing internally as opposed to externally.

SCULPTURED PROFILE

A section through our 'Sculptured' profile window

NRG tilt&TURN

The Tilt and Turn window has long been the window of choice for most of Europe. Where the UK market is used to having a smaller 'vent' window over the main opening sash, the Tilt and Turn offers the same ventilation qualities as a traditional UK style window yet incorporates them within one sash.
This gives a cleaner, simpler design that suits the aesthetics of more contemporary properties.
The advantages of the sashes opening inwards make them ideal for flats and appartments or anywhere that would necessitate outside access.

EASY CLEAN

As each sash opens inwards, it means you can clean the external face of the windows from indoors - no ladders, no hassle. This makes them ideal for inaccesible locations where a ladder wouldn't be able to reach.

BOTTOM - HINGED TILT FOR VENTILATION

VENTILATION

The tilt position is excellent for ventilation even during adverse conditions as it will minimise rain or wind entering. Air is guided upwards so as to reduce draught but enables circulation as the cooler, denser air falls. For maximum ventilation, sashes can be swung fully open as on a typical side-hung window.

SIDE-HUNG FOR EGRESS AND CLEANING

CONCEALED HINGES

The windows have a concealed hinges option rather than the standard surface-mounted hinge.

French windows

Our French windows have all the same great features as our casement windows but with a much larger opening area, providing an elegant solution that meets fire escape regulations where required.

All our French windows are manufactured to the highest standards, using premium quality components which are subject to rigorous quality checks throughout the manufacturing process.

Roller Bolts contract in order to lock the sash. Raising the handle by 90° releases them from the keep and allows the window vent to open.

The upper and lower parts of the locking mechanism contain shoot-bolts as well as the roller bolt, offering up to a 6 point locking mechanism which can be further enhanced by fitting our optional hinge bolts.

The hinges themselves not only enable a full 90° opening but when opened, will slide across to allow access to the outer sash surface from the inside, which gives for easy cleaning of the whole window.

flushSASH

One of the more recent and innovative additions to the Platinum**NRG** range, flush**SASH** timber effect PVCu windows offer a traditional timber appearance with unique flush-fitting sashes to replicate the original marque, but without the cost and maintenance normally associated with the timber equivalent.

Our flush**SASH** windows are low-maintenance, as secure as all our other windows and they're weather resistant, as well as being fully recyclable at the end of their lifespan.

These traditional style products are crafted using environmentally friendly lead-free PVCu profiles and can be specified with thermally efficient double or triple-glazed sealed units for optimum energy performance.

Our flush**SASH** timber effect PVCu windows can be specified right up to 'A' grade energy ratings and have also been approved by various Local Authorities for use within certain conservation areas. flush**SASH** windows are available in a wide range of authentic woodgrain colour finishes, as well as the more traditional black or white.

Different finishes can also be specified on the inside and outside of the frames to allow for complete personalisation. Dual-colour is a popular choice with this particular product and reflects traditional frames where the outside is painted a different colour to the interior, allowing for greater flexibility with interior decorating.

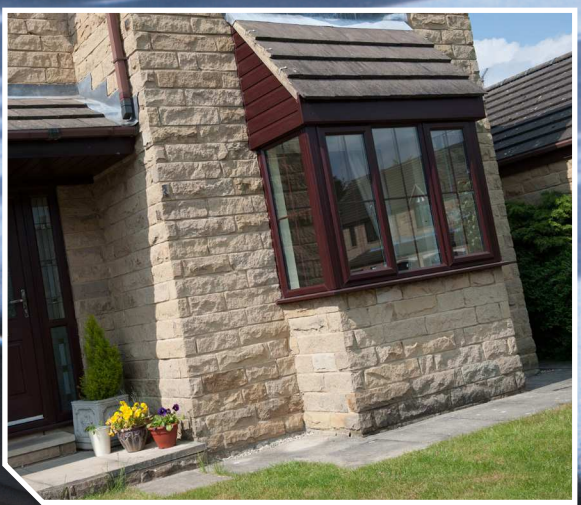
shaped windows

Windows play an essential role within your home, but that doesn't mean they have to be boring and a window can be a stunning work of art in its own right.

At PlatinumNRG, we can manufacture windows in virtually any shape to suit any style. With design shapes like arches, ovals, triangles, circles and virtually any shape in between, your windows need only be limited by your imagination.

Available in many styles, finishes and colour options, make your home as individual as you are.

Platinum NRG



bays & bows

Bow and bay windows are two similar yet very separate styles of replacement window.

Bow windows, as their name suggests, extend from the exterior walls of your home in a bow shape and consist of three or more window panels to form a curved 'bow' shape appearance.

Bay windows are more linear than bow windows and consist of two or more window panels. Like bow windows, they extend from the exterior walls of your home but unlike bow windows, they usually sit upon the walled fabric of the home and therefore follow the property contours rather than protrude from it.

We offer a comprehensive range of styles, materials and colours for both bays and bow windows, including structural connecting joining poles and base plates. Adding a bay window is a great way to project more light into your home creating a bright, fresh space for you to enjoy.

Our bay windows match all our window styles, so the choice and variety is enormous not only in the type of window, from casement to sliding sash, but also in the colour and finish. You'll be spoilt for choice!

There is a range of configurations:

- Square bays
- Bow bays
- Single end bays
- Corner bays
